## **DETAILED ACTION**

### ***Election/Restrictions***

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-8 and 12-13, drawn to a liquid crystal with double electrode, classified in class 349, subclass 147.
- II. Claim 9-12, drawn to a method of making a liquid crystal device, classified in class 349, subclass 147.
- III. Claims 15-33, drawn to a liquid crystal with a connection wiring (wiring along the substrate edge) classified in class 349, subclass 149.

The inventions are distinct, each from the other because of the following reasons:

Inventions I-II and III are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention I has separate utility such as in a display without any electrode running along the edge. See MPEP § 806.05(d). Invention I has a separate utility, in a device with only a transparent electrode and no second layer.

Inventions I and II are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2)

that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case the product can be made with out a concurrent etch step for both layers.

Because these inventions are distinct for the reasons given above and the search required for Group II in class 438 is not required for Groups I or III, and the entire search for group III is not required for group I or II, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
